Focus Area:

Eval. Notes:

On 12/19/14, the Department conducted a routine RCRA inspection at Advanced Enterprise Recycling Inc. a/k/a/ Doremus Avenue Recycling & Transfer LLC (DART) (NJR000061895), located at 540 Doremus Avenue, in Newark, NJ. the facility representative was Mr. Scott Cunningham, Region Vice President, Northeast. This DART facility has no previous RCRA enforcement history. DART was assessed a a conditionally exempt small quantity generator (CESQG) of hazardous waste. DART operates a solid waste transfer station, which transfers solid waste to railcars, and/or trucks for shipment offsite. The solid waste received onsite has already been source separated prior to delivery. If any recyclables are found in the solid waste, the material is rejected back to the generator. DART's hazardous waste is generated from the light maintenance performed on the onsite vehicles (trucks, front loaders, excavators), and waste processing equipment (compactors, shredders, etc...) that are used onsite. If any of the vehicles, and or heavy equipment needs heavy maintenance work, they are sent to an outside vendor for the repair work. The only source of hazardous waste is from a 30-gallon parts washer unit onsite. DART's maintenance manager, Mr. Joe Labarbera, indicated that this unit is used very infrequently. The last time it was serviced, was on 2/3/12, by Advanced Environmental Corp., located in Matawan, NJ, under a straight bill of lading. DART also periodically generates (every 3-4 months) used oil offsite, which is also transported offsite by Advanced Environmental. DART was found to have had a 275-gallon aboveground storage tank used for the storage of the used oil generated onsite. No problems were found with this tank. Lastly, DART was found to have been a very small handler of universal waste. Primarily waste lamps, and some waste batteries. However, during the coarse of the inspection, no universal waste was found being accumulated/stored onsite. DART uses Veolia ES Env
